

Regulation DD-15.0: Indoor Air Quality

- 15.1 For the maximum allowable indoor concentration levels of gas, fumes, vapor or dust at any industrial operation, refer Table 1 & 2.
- 15.2 Sampling and analysis shall be performed by DM / EHS-Trakhees-PCFC registered third party laboratories (Refer Health & Safety Guidelines) to provide a reliable indication of potential exposure.
- 15.3 The "Acceptable Concentrations" are the highest allowable concentration in the normal working atmosphere.
- 15.4 Employer/Lessee shall hold responsibility to maintain the required concentration levels as specified.
- 15.5 The competent department may require the employer/lessee to undertake studies by an approved laboratory (Refer 10.3) periodically to ensure compliance with the regulation.
- 15.6 An occupier in control of any workplace covered by a code of practice or handling any substance, for which an exposure standard is specified, shall comply with the technical and management directions stated therein.
