

CIRCULAR: EHS/PM/03/11

Dated: 10th May 2011

To: DPW Commercial Trucking & All Transport companies operating within Dubai Ports

Subject: Safety Induction Training for Third Party Road Trailer/ Truck Drivers

The purpose of this circular is to inform all concerned parties that based on EHS evaluation of various accidents which had occurred within Dubai ports, it has been observed that most accidents involving vehicular movement has been due to the lack of awareness regarding the applicable Port Requirements & Safe Driving practices on the part of the concerned road trailer/ truck driver(s).

Please be reminded that as per **EHS Port Regulations, Section 3.14.2: Induction training**, it is required that

1. General induction training shall be given to all persons who are to work in ports.
2. This training shall cover the general hazards associated with ports, which are often quite different from those encountered in other industries.
3. The training shall also include site-specific hazards and relevant local rules, emergency arrangements and the need to cooperate with other persons working in the port.

In order to comply with the above requirements, it is required that all Third party transport companies including DP World road trailer/ truck drivers shall be provided with “**Safety Induction Training**” to keep the port and its operations safe, clean and accident free.

Above mentioned training shall be provided to all concerned parties not later than 31st December 2011.

Together we can promote a safe, cleaner and accident free working environment for all port users.

All enquiries related to this circular should be sent to EHS.Ports@trakhees.ae

Sincerely,

On behalf of

A.Nazeer Hussain
